# Sports Events Reminder

by richard tian

An app for my father who loves watching sports games but always missing the events when they begin. The concise, elegant interface of this app is also designed for him.

LIST OF EVENTS

ALARM

The main function of this app is on this page - a timer that counts down the remaining time for the next event. This is also an index page for the app, since it has different buttons to direct the user to other pages. The information of the next event will be shown.

A LIST OF AVAILABLE ALARM SOUNDS

This page is for user to set up the alarm settings to remind the user before certain time of the upcoming event by using text and sound. The user may select different types of alarm sounds and customize the time of the alert. The user may also disable the alarm and only use text reminder; the user may even completely disable the reminder.
